Forecast for Sunday 23 Jul 2023

Weather: An extensively cloudy and wet day, with a band of rain having stalled overhead in the vicinity. Light winds in valleys and the persistence of the rain are likely to mean poor visibility and difficult navigation throughout, with rivers likely to be in spate when considered with Saturday's rainfall. There is a small chance that the rain may clear southwards later in the evening, although widespread low cloud is likely to persist for a time to hamper navigation.

Chance of cloud-free hill tops above 600m: Near nil.

Low Cloud and visibility: Visibility poor throughout, with cloud near valleys floors, perhaps blanket at 400 metres at best, with ragged cloud below this.
